FusionStorm Joins MultiFactor Corporation's SecureAuth® Partner Program

SecureAuth® the industry's most secure identity and two factor authentication solution on the market is now available through FusionStorm

June 25, 2008 - *PRLog* -- Irvine, CA, -- FusionStorm, a Microsoft Gold Certified partner and a Cisco Gold Certified and VPN/Security Specialized partner, today announced the alignment with MultiFactor Corporation, an innovator in two factor authentication, web application security and Cisco VPN Authentication solutions. As a MultiFactor Corporation SecureAuth® Partner, FusionStorm will now provide the tokenless, non-phishable, two-factor authentication and identity enforcement solution.

"Security is instrumental to our customers," said Mike Chase, regional director of engineering at FusionStorm. "Partnering with MultiFactor allows us to offer the most advanced form factor for our secure web and Cisco VPN deployments."

SecureAuth® is a tokenless, non-phishable, 2-factor authentication and identity enforcement solution. Software-based, but stronger than hardware token, SecureAuth makes non-phishable web application security and Cisco VPN Authentication easy to manage and cost-effective. The SecureAuth solutions validate both the client and server sides, utilizing an appliance or a Web plug-in and current data stores.

"As both a Microsoft and Cisco partner, FusionStorm is a strategic partner for MultiFactor in assisting our customers to remain secure," said Garret Grajek, chief operating officer of MultiFactor

About FusionStorm

About MultiFactor Corporation
MultiFactor Corporation is pioneering the delivery of the strongest, proven 2-factor authentication, Web application security, IPSec and SSL VPN security methodologies in an easy-to-deploy, low-maintenance product called SecureAuth™. This tokenless, browser-based authentication solution generates and validates client- and server- side certificates without PKI. SecureAuth represents the evolution of a technology that, for more than two decades, has remained the de facto standard for identity and access management technology. More secure than hardware or software tokens, SecureAuth is inexpensive to acquire, deploy and manage. MultiFactor Corporation's innovation and its development of real-world security solutions draws from a diversified team of cryptographers, network and Web application specialists and certified security engineers.
