

Purifyair 30m Ce Fire Escape Smoke Hood - Saves Lives

60,000 people will be seriously injured in fires this year, 10,000 will die. 80% of those deaths are caused by inhaling toxic smoke & fumes. If you're more than 30 seconds away from an exit, it may be too late without our device.

Aug. 15, 2008 - [PRLog](#) -- 60,000 people will be seriously injured in fires this year, and 10,000 will die. Approximately 80% of those deaths will be caused by inhalation of toxic smoke and fumes, not by burns. It is smoke, not flame or heat, that kills the vast majority of fire victims.

Smoke is laden with a host of lethal toxins, including:

- Carbon Monoxide
- Hydrogen Cyanide
- Hydrogen Chloride
- Sulphur Dioxide
- Ammonia
- Benzene
- Formaldehyde

Carbon monoxide (CO) is the major toxin responsible for most fire-related fatalities. It's often called "the silent killer" because it's odorless, colorless, and incredibly deadly. CO is present in virtually all fires, and is lethal in concentrations as low as 0.5% (500 PPM) and incapacitating in even lower concentrations.

Engulfed in smoke, it's difficult to see, breathe or communicate.

People exposed to smoke quickly lose the clear-headedness, mobility and orientation that are vital to a safe escape. Panic-stricken victims often hyperventilate, gulping in massive amounts of toxic smoke and fumes and greatly hastening their demise. Shockingly, **the time interval from detection to death can be as little as 60 seconds.**

A smoke alarm or CO detector will alert you to the presence of smoke or toxic gas, but it will not provide a passage to safety. **If you're more than 30 seconds or so away from an exit, you may not make it without some sort of breathing protection.**

Be aware that our **PurifyAir 30M is CE EN403-2004 Certified**

Our product protects You and your Loved Ones 100% from SMOKE - FLAME & BURNING ASH up to Over 3000 Degrees F (1600 C) of Direct Flame Protection.

Protects you from Carbon Monoxide (CO) / Hydrogen Cyanide (HCN) / Hydrogen Chloride (HCL) / Acrolein (CH₂CHCHO) / Anthrax / Flame / Thermal Radiation / Dropping Dust and Hot Ash from Fire and protects the head 100% from many other Toxic gases and smoke.

Technology used by NASA - FEDEX - BP Exploration - Shell Oil - The NBA – US Air Force - and 1000's of others.

We are the international manufacturers and agents with offices located in St. Louis, Missouri USA and Guangzhou, China, specializing in Affordable Life Safety Equipment. Providing solutions for Governments, Military, Fire, First Responders, Rescue Authorities and PPE Personal Protective Equipment for Individuals WORLD WIDE.

Contact us for information on [CHEM-BIO-GAS Escape Hoods, EEBD, SCBA, Coal Mine, Marine Safety, Fire Extinguishers, Suppression Systems, Fire Hose, Hose Reels, and other Fire Fighting and Rescue Equipment. - Working Together - Saving Lives

We will be at the 2008 NSC – National Safety Council Expo in Anaheim, California September 22-24 Booth # 1973 where we will introduce New products in our "Safe Escape" range of FIRE ESCAPE SMOKE HOODS, Fire Suppression Systems, Fire Extinguishers and other Rescue Equipment.

We will be participating at the upcoming 2008 MESSE ESSEN FIRE SAFETY & SECURITY Trade Fair in ESSEN Germany October 7-10.

We will also be at the CHINA Fire 2008 in Beijing October 25 to 28 2008. See you there.

Our HFZY20 Oxygen Generating Self Rescue Respirator provides up to 60 minutes of breathable Oxygen through a Chemical Process. Providing up to 800 C (over 1400 F) Direct Flame & Hot Falling Ash protection. No need for heavy expensive oxygen tanks. This unit is ideal for use in the Shipping Industry / Private Yachts / Chemical / Oil Facilities / Hotels / High Rise Office Buildings and by Correctional Facilities / Police / Fire Rescue / First Responders and the mining industry. Retailing at only US\$150.00 much less than a SCBA which costs over twenty times more.
