

Liposuction Alternative Medical Breakthrough Announced By Dallas Physician

Kiran Robertson, M.D., introduces a non-invasive Liposuction procedure to achieve optimal results

Aug. 15, 2008 - [PRLog](#) -- DALLAS — Board certified in Internal Medicine with advanced training from Aesthetic Medical Educators and the Aesthetic Enhancement Institute, Kiran Robertson, M.D., debuts her extraordinary new procedure for men and women. Non-invasive radio frequency assisted lipoplasty (RFAL), is the liposuction alternative with permanent results. Dr. Robertson assures patients they will achieve the look they desire without the pain, scarring, downtime or expense that comes with traditional liposuction.

“I am consistently looking for ways to meet the evolving needs of patients,” says Dr. Robertson, “This new medical procedure for treating fat and cellulite is a way for my patients to see dramatic results in a relaxing way with no downtime.”

After moving her highly acclaimed practice from Plano to Dallas in June 2008, Dr. Robertson continues to make an effort to provide well-rounded patient services with the addition of RFAL to her list of aesthetic treatments. For patients whose diet and exercise regime just isn't zapping that extra baby weight or love handles, who believe a youthful appearance is essential to their success, or who simply want to feel better, RFAL is the newest and most innovative option for overall wellness.

Using a form of radio frequency to deliver volumetric heat without damaging the epidermis, the procedure works to melt both subcutaneous and unhealthy visceral fat (that even liposuction cannot treat), reduce cellulite, reshape problem areas, tighten skin and reduce wrinkles. There is no invasive surgery, painful needle injections, inflammation, scars and no downtime for recovery. Patients should not be surprised to see results of up to 3 inches in circumference loss and up to 10 pounds of weight loss in just 6 weeks! "RFAL produces results 560% faster than other forms of non-surgical treatment currently available," says Dr. Robertson. "The world has waited a long time for an easier solution for unwanted fat reduction, and RFAL literally melts fat extremely quickly and without discomfort."

ABOUT DR. KIRAN ROBERTSON

Having developed and maintained a thriving Internal Medicine practice and lending her skills to a variety of volunteer programs in the area, Dr. Kiran Robertson, M.D., has expanded her services to include non-surgical cosmetic treatments to help patients look and feel their best. Her well-rounded services include medically administered aesthetic treatments, diet and exercise. Her new non-invasive radio frequency assisted lipoplasty (RFAL), is an ideal liposuction alternative with permanent results. Originally trained in Internal Medicine and Anesthesiology, followed by additional advanced training in Botox and Restylane, she is highly regarded among both her peers and patients. The results among both men and women speak for themselves.

A published researcher and lecturer, Dr. Kiran Robertson has hosted speaking engagements and aesthetic presentations across the DFW area. From several women's health expositions, to spas and country clubs, Dr. Kiran Robertson has shared her expertise in aesthetics and anti-aging therapy.

You can contact Dr. Kiran Robertson, M.D. at (214) 265-1366. Her new location is at 6014 Sherry Lane, Dallas, Texas 75225.
