

Philadelphia CCTV Cameras & Surveillance Systems In Philadelphia PA Focus of FireSecurity101.com

Philadelphia surveillance cameras and closed circuit video systems are a key component to an effective security system. CCTV cameras can provide the ability to recognize danger and call the police BEFORE a confrontation occurs, says FireSecurity101

March 6, 2009 - [PRLog](#) -- Philadelphia surveillance systems and CCTV cameras are the new business focus of FireSecurity101.com. Violence in the city of Philadelphia, PA... especially the recent shootings of Philadelphia police officers have FireSecurity101's many commercial business and residential clients looking to upgrade their existing Philadelphia CCTV surveillance camera systems.

The perception of many of the company's clients has been that once a personal confrontation occurs between a potentially dangerous criminal and an individual, the chances of violence are at an all-time high in the city. They say that criminals' willingness to fire guns at the city's police force has proven this.

Whether the goal of the criminal is to finish the crime, or simply to escape, desperation has lead to tragic results more and more often in recent times.

Philadelphia CCTV systems (closed circuit TV), when designed by FireSecurity101's, are designed to help the home or business owner recognize, through video surveillance, when a dangerous situation is developing... and to hopefully avoid it. "There is a huge difference between catching a burglar, thief, or criminal red-handed on a video surveillance TV screen and being face-to-face with him," says FireSecurity101's chief CCTV systems designer and engineer, "call the police and get the experts involved WITHOUT having that confrontation is pivotal in these situations."

FireSecurity101 has been protecting Philadelphia, PA's residential homes and commercial businesses for over 20 years and is proud of its track record of providing the most effective Philadelphia video surveillance systems (at the most reasonable prices) in the city!
