

Make Everyone on the Block Jealous w/ the Digital Watchdog Bullet Cam. It's what the Casinos use!

The B1363TIR - Hi-Res Vari-Focal IR Bullet Cam is jam packed w/ features that make it one of the most advanced bullet cameras on the market today - from its Sony CCD chip to its Super IR Illuminator that can help the cam see 100 ft. away in the dark

March 18, 2009 - [PRLog](#) -- The B1363TIR - Hi-Res Vari-Focal IR Bullet Camera is a smart, rugged, and unique member of the Ultimate Bullet camera series by USA based Digital Watchdog (DW). This camera is used by casinos, schools, banks, law-enforcement, retailers, and savvy homeowners! The Bullet Camera shoots in color and can see in the dark 100 feet away, plus it has a built-in heater and joystick. It simply doesn't get better than this!

The B1363TIR Camera features a sleek attractive design that includes DW's patent pending No Fog and No Condensation circuit, which (as it sounds) means there will be absolutely no fog or condensation under any weather condition. But that's not all when it comes to the stellar weather design. This camera is also IP66 (Ingress Protection) rated for severe weather conditions. Here's a breakdown of that classification – the camera can be directly washed down with a harsh spray jet and still function properly. Now that's cool!

For this Digital Watchdog Camera, it's nothing but the best. That's why enclosed in it is a Sony HAD CCD image sensor, which guarantees long term color sensitivity and produces a picture with clarity for both day and night. There are 540 TV lines of resolution and a 3.3 – 12 mm vari-focal auto iris lens, making for a great shot at any angle. You can also externally control the zoom and focus of the camera.

The camera is also part of DW's Starlight Series line of products which are designed for more light sensitive security applications. The camera is equipped with a Digital Slow Shutter feature (DSS) that increases the length of time the shutter remains open so it can collect ambient light, therefore illuminating typically dark environments.

The B1363TIR has a 3 dimensional simple positioning bracket that you can detach from the camera for easy camera installation, unlike other self contained camera and bracket devices that don't allow for easy assembly or repair.

Also included in the Camera kit is mounting hardware, a paper mounting template, and a small service port monitor output device. The output device is used to connect the camera to a mobile monitor so you can view and adjust the focus, zoom, and other features of the camera without having to go back and forth to the central monitoring station.

The B1363TIR weighs just over 2 pounds and comes with a 5 year manufacturer warrantee. For more information on the B1363TIR - Hi-Res Vari-Focal IR Bullet Camera please go to <http://www.HomeSecurityStore.com>.
