RE: Fap Turbo Review

**Fap Turbo** is a piece of software program that performs the Foreign Exchange (Forex) trades on autopilot based on various in built intelligence and algorithms. What is so special about Fap Turbo ? Well, first of all, many Forex products use back testing and use fake results and in reality the original accounts could be different. But the Fap Turbo creators have so much faith on their product and uses live trading accounts directly on their web site to prove the power of the system with real-time updates. Secondly it solves many common issues that exist in today's Forex Robots which are outlined below.

### **Fap Turbo Review**

Like you I was skeptical too about this before purchasing this software. After researching on the net, I found the reason for the hype. Basically the original author (Marcus Leary) of another popular Forex Robot (Forex Autopilot – FAP) was generous enough to share his source code with three brilliant guys Steve, Mike and Ulrich who developed an improvised version of Forex Autopilot called it FAP Turbo with a lot of bells and whistles to make this software, THE BEST in the Forex industry.

The most common problems that the current Forex Robots have are “No Stop Losses” and Fap Turbo betting strategy which could wipe out your bankroll in high drawdowns during the losing streaks or make you a huge profit like a slot machine. Fap Turbo offers solutions to both these problems by lowering drawdowns and fixed the “Stop loss” strategy for a safer trading. And much more new features were added to fab turbo that no one has seen in the Forex robot community.

This technique was optimized to avoid trading during risky market conditions.
