

DSC ALEXOR PC9155 Do It Yourself Wireless Security Alarm System now shipping

The new DSC ALEXOR kit is now shipping from our office!

Aug. 9, 2009 - [PRLog](#) -- At last, we are now shipping the long awaited DSC ALEXOR wireless alarm system.

DSC has introduced a "truely wireless" panel with great wireless range, many user functions that make sense, and ease of programming. Its so easy that our Do-It-Yourself section of our website has already taken several orders.

By ordering exactly what you want, not all the "extras" other alarm companies try to sell, you get exactly what you need. We help in the system design and once purchased, a fully programmed ready to install system is sent to your address. Simply plug the main unit in and install your sensors. Once this is done, call our office to confirm a signal and your up and running. Why pay hundreds of dollars extra so you can have someone else do it?

Don't know how to install the sensors? No worries. When you get your system, you'll be given a website address to view installation videos. They are short and to the point. If you have a screwdriver, you can do it. Average installtion will take less than an hour for a basi system.

ALEXORS many features include:

- 32 wireless zones, 16 wireless keys (without using a zone slot)
- Wireless quick enroll
- Template programming
- 16 user codes, 1 master code and 1 maintenance code
- Account code error checking (patent pending)
- Alternate communications via GSM/GPRS and IP
- Onboard siren at 85dB
- 2 Input/Output terminals
- 500 event buffer
- Wall and case tamper
- 24Hr Battery backup

For furhter information, check out our website at <http://www.absolutesfd.com> or call 479-925-9200.

###

An alarm company in Northwest Arkansas specializing in high-end fire alarm, CCTV, security and access control systems. Our compnay was established in 1991. With the growing demand for DIY products, we opened a seprate division relating to those needs.
