**Oct. 11, 2009 - [PRLog](#)** -- This little mini is smaller than a credit card and not much wider. This phone really appeals to these folks because this gadget can slide into a small pocket or a thin slot in your purse. It doesn't weigh much or drag you down. The small size of this one doesn't mean that the manufacturer has skimmed on what you are getting. This phone is still a dual SIM. It is quad band. It has the shake and tilt feature and an upgraded 2.0 MP camera, and Bluetooth. It has a radio, ebook reader, MP3 / MP4 player and video recorder. It can hold up to 8GB. There is web browsing, email, sms, mms, and ims. It has a long battery life, holds 300 groups of contacts, and has calendar, notes, to do list, etc.

It still has the touch screen that pops up with a digital QWERTY keyboard. It takes a bit of getting used to since this is a smaller phone, but a stylus can make pretty quick work of this. Many people consider this a fair trade off for such a light, compact phone.

### Features:
