

The Visonic PowerMax Pro w/ a Built-in GSM Module far surpasses other DIY Home Security Systems

The PPROKTKTGPE - Visonic PowerMax Pro with a Built-in GSM Module is a high end security system which is capable of allowing homeowners to view and control their home from anywhere, via any web browser, or even cell phone.

Oct. 14, 2009 - [PRLog](#) -- The PowerMax Pro with a Built-in GSM module offers control unlike any other Do-It-Yourself home security system on the market today. It is truly spectacular technology that is safe, secure, fun, and professional. The PowerMax Pro has all the great features of the PowerMax Plus Security System, but with even more internal add-ons making for a more sophisticated approach to home security. The PowerMax Pro is a wireless alarm control system that provides protection against burglary, fire, and tampering. In addition, it can be used to control lights and electrical appliances within your household and/or to monitor the activity of disabled or elderly people left at home. Status information is presented visually and verbally, and in most cases a recorded voice prompts you to take correct action.

The internal GSM (global system for mobile communication) module within the PowerMax Pro operates over a GSM/GPRS cellular network. This means the system reports and communicates, not only with landline phones, but with cell phones as well. Therefore, if your telephone lines are cut or disabled, the home stays secure and there remains a way for the system to call a monitoring station, or you, or both.

The PowerMax Pro also supports X-10 interface for home management of alarms, lights, appliances, and more. In addition, through Visonic's Powerlink and VDNS management platform, homeowners can set up to 4 high quality color surveillance cameras and view footage both live and recorded online. In the case of an event, you can be notified by cell phone, text, or e-mail.

This latest system from Visonic has a new look not yet seen in the home security market. It has a modern, clam shell design, which comes in a silver metallic color. Another new feature is that the PPROKTKTGPE PowerMax Pro kit comes with 2 proximity tags which allow for day-to-day conveniences. To work a tag, you simply hold it in front of the reader and the system can be armed or disarmed - no codes necessary. And if a tag is lost or stolen, it can easily be deleted from the system.

The Pro is also easy to set up and easy to run. As an all in one solution, the system was designed to be up and running quickly. You will breeze through installation using the system's intuitive menus and voice prompts. Here's a recap and a look at some more features -

- High-end, modular design
- Self contained; no need for external boxes
- Includes internal GSM communicator
- Integral X-10 interface for home management alarms, lights, home appliances control
- Partition-ready controls up to 4 partitions (optional)
- Event reporting to: monitoring stations, pagers, SMS messages, e-mail, web applications, mobile phones, landline phones
- LCD-based user interface
- Elder care application
- Up to 72 hours battery backup
- 2-way PowerCode™ RF System with diversity antenna enables support for Visonic's 2-way sirens (MCT-710, MCT-720) and 2-way keyfob (MCT-237) for instant feedback from the system

- Internal or external power supply
- 28 wireless zones
- Supports 8 users codes
- Additional 2 hardwired ports, 1 12v hardwired siren port and 1 PGM port for full coverage of connectivity options
- Full compliance with most international standards and regulations, including FCC, CE, EN50131 grade 2

You can find throughout the Home Security Store website PowerMax Pro accessories, such as a Universal Wireless Keypad, a 2-way Wireless Keypad, a Wireless Smoke Detector, and a new 6-button miniature Wireless 2-way Keyfob.
