Nov. 2, 2009 - [PRLog](#) -- Introduction of Wockhardt Hospital And Kidney Institute India, Kolkata

* Wockhardt Hospital & Kidney Institute - Kolkata, part of premier chain of Wockhardt Hospitals and an affiliate hospital of Harvard Medical International of USA is the first and the only dedicated super specialty Kidney Hospital in Eastern India, established in the year 1988...

* Over the years it has become the single point solution for all kind of Urology and Nephrology diseases. It has emerged as a destination for world class clinical work in Urology and Nephrology as well as academic and research work in this field too...

Facilities at Wockhardt Hospital And Kidney Institute, Kolkata

Stone Management

The Wockhardt Stone Management Unit has 17 years experience in managing stones and offers comprehensive care in the treatment of kidney stones. Kidney stones can be treated with various procedures depending on the size of the stone. ..

Facilities Available : -

* Lithotripsy : - A powerful Dornier Lithotriper which uses both X-Ray and ultrasound localization for real time image. This allows the stone to be seen at all times during treatment. With this machine the patient needs only a light sedative and the pain is minimal. The lithotripter generates shockwaves, which crush dense stones into sand like particles, which easily pass with urine.

* PCNL : - Percutaneous Nephrolithotomy provides patients with a safe and effective way to remove kidney stones using a minimally invasive surgical procedure. A form of key-hole surgery that is used for larger or remotely located stones in kidneys...

Department Of Minimal Access & Advanced Laparoscopic Surgery

The latest offering from Wockhardt Hospitals Kolkata brings to you the latest techniques, modern technology and instruments combined with high precision skills of the Wockhardt team of surgeons and gives you the alternative to conventional method of surgeries...

Wockhardt Eye Clinic

Wockhardt Eye Clinic is established in 1988 and is located at Wockhardt Medical Centre, 2/7 Sarat Bose Road, Kolkata 700 020. ..

Services & Facilities

Phaco Surgery : Phacoemulsification is the newest & latest method of cataract and IOL surgery. The cataract is removed using ultrasonic energy through a small opening.

The advantages of Phacoemulsification are : -

- * Early rehabilitation because of small wound
- * Minimum post operative complications
- * Less pain and redness..

Facilities Available : -

* Dialysis Center : - There are two types of dialysis: hemodialysis and peritoneal dialysis, both of which are available at the Wockhardt Hospital and Kidney Institute.

* Hemodialysis : - In this type of dialysis, an artificial unit called a dialyzer mimics the action of the nephron. To undergo hemodialysis, a person must first have a minor surgical procedure to create an access for the needles and tubing needed to connect the blood circulation to the dialysis machine. ..

* Peritoneal Dialysis(CAPD) : - This is an entirely different way of filtering wastes from the body. Peritoneal dialysis utilizes the peritoneal membrane, which is the lining of the abdominal cavity. The peritoneal membrane is very large, and has a rich blood supply. In people with kidney failure, the peritoneal blood supply, like all the other blood in the body, contains excessive waste products and fluid, When clean fluid comes into contact with that blood supply, the wastes travel into the cleaner fluid...

* Kidney Transplant : - Kidney transplantation is the best way to treat kidney failure or end-stage renal disease (ESRD). The Kidney Transplant Program at Wockhardt Hospital and Kidney..
