## **Wave Software Wins Two LTN Awards**

Trident Pro's e-discovery collection and identification each win a bronze award

**Dec. 11, 2009** - *PRLog* -- ORLANDO, FL - Orlando-based Wave Software, a leading provider of early case assessment, legal hold, litigation support and electronic data discovery technology for global corporations, today announced it has won two LTN Awards. It won a bronze for Trident Pro De-Duplication, EDD Services Collection and a bronze for Trident Pro Near Duplicate Detection, EDD Services Identification. Wave Software's president, Robert Childress III, will officially receive the awards during the Seventh Annual LTN Awards cocktail reception on February 1, 2010, at the New York Hilton following LegalTech.

LTN Awards recognizes the best technology use - and users - in the legal profession. Law Technology News subscribers voted for Trident Pro software as one of the leading e-discovery collection and identification EDD services. Trident Pro e-discovery software is used by law firms, corporate legal departments, and litigation support and e-discovery service providers to quickly preprocess, filter and cull data in preparation for attorney review.

"Especially in these trying times, it's encouraging and exhilarating to see such leadership and innovation in our legal technology community. Congratulations to all the individuals and organizations that continue to inspire all of us," stated Monica Bay, Editor-in-Chief, Law Technology News.

Winning these two awards comes shortly after Wave Software's announcement of winning an ITFlorida technology award. ITFlorida recognized Wave Software as a company that transforms, unites and builds recognition for the exceptional achievements of Florida's information technology community. Wave Software has won these awards for the impact, innovation and advancement of its flagship product, Trident Pro.

"The awards validate Trident Pro as a key technology for getting control of e-discovery data. It also recognizes the strides we have made as a company since our launch in 2006," said Robert Childress, President of Wave Software. "Since its inception, Wave Software has experienced a minimum of 200 percent growth year after year. The company's success is being driven by a dramatic increase in the number of global consulting firms, law firms, corporate legal departments and legal vendors that have adopted the company's Trident Pro suite of applications. We are excited to receive these awards and we're grateful to the people that voted for Wave Software and would like to thank them for acknowledging our accomplishments."

In the past, Trident Pro won the 2008 Socha-Gelbmann Top Provider award, ITFlorida award and since 2007 has participated as a sponsor of the LTN Awards.

Trident Pro integrates seamlessly into the law firm, corporate legal or legal service provider's current workflow processes. It allows users to review electronic data in a standard review tool and isolate the responsive data that can then be delivered to opposing counsel in their native file format. The industry-first, built-in Native Review Bridge capability automatically maps fields and loads data from Trident Pro into common review platforms.

More information on Wave Software's Trident Pro can be found at www.discoverthewave.com.

**About Wave Software** 

Wave Software, based in Orlando, Florida is a leading provider of early case assessment, legal hold, litigation support and electronic data discovery technology for global corporations. Wave's flagship product, Trident Pro, provides the fastest, most accurate de-duplication, near-duplicate detection, regeneration and export of native and foreign language electronic files. Trident Pro includes Native Review Bridge technology that automatically maps and loads processed e-discovery data into CT Summation, iCONECT, LexisNexis Concordance and other common review platforms. Trident Pro software provides litigators in-house capability to cut down data sets to manageable amounts and then upload onto repositories for review and production. Wave offers software, consulting, and training specialized in the legal industry. For more information, visit www.discoverthewave.com.
