Is Fat Burning Furnace for men or women?

Both! Contrary to how you might feel about this, the reality is that men and women should train and eat almost the same exact way for the best fat loss and fitness results. There are of course some small differences, but for the most part the methods are the same. Just take a look at how many success stories we get from both men AND women, and you'll see how FBF can work for everyone.

Your Fat Burning Furnace System looks fantastic! Will I need to take a week off of work to study it? Well, the book is very descriptive because I wanted to cram every ounce of fat loss and fitness knowledge I could into it to help as many people as possible achieve their fitness goals. However, I designed it to be easy to "consume". You should be able to get through the material in just a matter of hours. I am also providing plenty of pictures (and videos with the deluxe package) to help you understand the exercises and concepts right away.

Does your method require me to adhere to a strict eating plan and count my calorie intake every day? NO! While you certainly can't eat loads of junk food and expect to burn fat maximally, the methods I recommend are super easy to understand and even easier to incorporate into your daily life. And while it's a good idea to understand how many approximate calories you need each day for best fat loss results, you don't have to count calories on FBF! The best part is, you can make this part of your lifestyle forever because your body craves the foods I recommend.

Will your recommendations make me get bulky or too muscular?

Getting bulky is a relative concern...what might seem bulky to me may not seem bulky to you. That being said, most women and many men will not get bulky from following the techniques described in the Fat Burning Furnace book. This has to do with the fact that 99% of women (and most men) lack the necessary testosterone levels and other genetic factors to produce overly large muscles. What will happen is the development of shapely and sexy muscle that will make you the envy of almost everyone you know!

Will your system work for my family, both my young kids and my parents or even my grandparents?

The principles recommended in the Fat Burning Furnace eBook do not discriminate against any age, including those in their late teens and senior citizens. In fact, the way I instruct my students to perform the Fat Burning Furnace exercise is ideal for all age groups. Just take a look at all of the quotes from happy readers...you'll see young people and those that are even in their 70's enjoying the results FBF has given them. That being said, you should always get a full physical examination from your family doctor before undergoing any type of exercise or nutrition approach.

What kind of physical shape do I need to be in before I can start using your method right away?

You can be in almost any kind of shape to start the Fat Burning Furnace program...the more out of shape you are, the faster and more amazing your progress will be! I even provide a break-in routine for those who have been completely sedentary in the last few months or years. If you happen to suffer from any chronic health issues, you should of course first consult with your physician prior to starting any fitness or nutrition routine.

Can FBF help me lose my belly, butt, or thigh fat? These have always been problem areas for me.

Absolutely. Contrary to widespread misinformation, you can't spot reduce fat anywhere on your body. You have to lose it all over, that's just how the body works. FBF understands this and utilizes several techniques to maximize this fat loss rule so that you'll also lose fat in those problem areas. In the Deluxe FBF system, we even provide specific targeting routines just for these areas and more to maximize the leanness and shape in those areas.

Is this system more for burning fat or for building muscle?

Application of the Fat Burning Furnace eBook will result in both because the most efficient way to ignite your fat burning furnace involves keeping as much lean muscle on your body as possible. If you have a hard time embracing the idea that you're going to build muscle, get over it. The sooner you do, the sooner you'll start melting fat like a machine 24/7.

How soon can I expect to see results with the FBF system?

This depends on your existing condition, but if you apply the FBF principles as I've outlined them, you'll notice results immediately. Immediate results will be quick strength increases, and within a couple of weeks you'll begin melting away body fat and building lean muscle and creating cardiovascular health as well. It's not uncommon for readers to lose 5-10 pounds of body fat or more in the first 2-4 weeks.

If you were to follow the FBF system for a full year, it is not uncommon for you to come very close to maximizing your ultimate genetic potential for a lean, strong, and healthy body. And all in just a few minutes, 2-3 times per week, and without boring cardio or those maddening diets. Now that's something worth celebrating!

Like we said before, does this mean you will succeed with his program? That's entirely up to you. Fat Burning Furnace is that program that will make you work out just enough to lose weighy, yet not make it frustrating to the point where you quit. It's actually fun! It's a program I highly suggest to anybody who is not currently successful with their current fat loss program!

You can get all of this information with Fat Burning Furnace. Lose your fat, change your life.
