When we say garnet, it is an excellent and beautiful gemstone that has a deep and vibrant color. When it is set with a light toned precious metal band like white gold, platinum or silver, it will really look particularly amazing. Garnets species are found in many colors including red, orange, yellow, green, blue, purple, brown, black, pink and colorless. The rarest of these is the blue garnet, discovered in the late 1990s in Bekily, Madagascar. In daylight, their color ranges from shades of green, beige, brown, gray, and blue, but in incandescent light, they appear a reddish. Due to their elegant hues and dazzling aesthetic, garnet engagement rings are items that will always be appreciated and adored by the wearer. Garnet engagement rings do not only focus on the elegant and precious gemstone. The majority of these rings that includes diamonds which accentuate and at the same time, provide an additional value. The contrast between the brilliant shimmer of colorless diamonds and the deep hues of a flawless garnet makes for one piece of jewelry that looks uniquely resplendent.

Wearing of engagement rings will bring praises and appreciations from your friends. It will also give you enjoyment and happiness while staring on it. Diamond engagement rings, as what is emphasized above, are absolutely common and people hardly give them a second glance. Because of this, garnet becomes so valuable.
