They also have numerous other products for men's hair growth laser, such as DHT blockers, therapies, shampoos, advanced Rogaine formulas, etc. these combined method has been proven to grow hair for Hair Loss in NYC, NY, New York. HLCC has 3 doctors on staff that they can call upon to help with clients, and write prescription with strength Minoxidil, Propecia, and many more.

Laser Hair Growth Salon is new, non-surgical, scientific approach in the treatment of hair loss. 160 Laser Diode Laser hair growth in best New York Salon promotes hair growth in those with thinning hair, and scalp problems. The hair loss laser has been medically tested and is FDA-approved for safety and effectiveness. This is a non-surgical treatment. The hair laser utilizes a device containing 110-160 therapeutic soft low light level lasers. Hair growth is promoted by light energy directly from 110-160 laser diodes covering your head. LHT functions on the same scientific principle, as that of photo-bio-stimulation; laser light stimulates cell metabolism and helps damaged cells to repair themselves. This breakthrough technology has recently been featured on national newscasts across the country.

The portable Laser Comb is a low-level light device compared to that of the studio Laser Hair Treatments. Typically the portable device is based on 5 - 12 diodes and a studio laser has 110 to 160 laser diodes. With having the lower diode count, your regrowth may take longer to achieve to that of the output of using an in-studio Laser. Recently a new trend has emerged in portable laser devices. Portable lasers have between 60 - 75 laser diodes and bridge the gap between home treatment and achieving better results.

The studio lasers are normally comprised of treatments using from 110 to 160 diodes. Now in comparison to the portable Laser Comb, that is over a 100% increase in diodes used. Being that this method is FDA-approved; you are not being subjected to anything harmful. You are only using a higher amount of those diodes, thus, you are increasing the benefits of the Laser Hair Treatment.

NYC Laser Hair Growth treatment works by stimulating the scalp to increase circulation. This treatment increased circulation of blood flow to the hair follicles allows flows to the hair follicle again. They do laser hair growth for both Men and Women with free scalp exam. This laser hair growth program usually requires clients to stay with us for a year or more. NYC men's Laser Hair Growth salon also sell home lasers which people can use in their homes. Their hair laser has 160 diodes, which are laser outlets, for maximum coverage of the head, and allows for maximum penetration. Many of their clients combine the Laser Hair Therapy with their Hair Loss System, this way you can have immediate results, and grow your hair underneath at the same time.
