

## **CMD Bioscience and Research Foundation announces patent for notice of allowability**

*CMDBioscience and Research foundation of SUNY on behalf of Stony Brook University today announce the notice of allowability for patent for affinity score a proprietary method for estimating protein-protein binding affinities.*

**April 27, 2010** - [PRLog](#) -- ORANGE, Conn., March 31, 2010 -- CMDBioscience, a CT based biotechnology company specializing in computer-aided peptide drug discovery, and Research Foundation of SUNY on behalf of Stony Brook University announced today that the US Patent Office has issued a notice of allowability for the provisional applications 60/785,232 and 60/878,217

"The key to successful structure-based peptide drug discovery is a rapid accurate method for estimating and scoring protein-peptide binding affinities. The just granted Affinity Score 1.0 patent clearly affirms the innovativeness of the CMDBioscience methodology and confirms our leadership in computational peptide drug design and discovery", said CMDBioscience cofounder and CEO, Dr. Joseph Audie.

CMDBioscience, a privately held company based in Orange, CT, is an innovative leader in the development and application of advanced computational methodologies, expediting time to market for our partner's peptide-based products. Serving the pharmaceutical and biotech industries through international partnerships, collaborations, technologies and products, CMDBioscience is setting the standard for computational peptide discovery.
