

The Perfect Woodworking Square? New Measuring Square from Woodpeckers Now Available

Carbide Processors, Inc. will be taking pre-orders for a brand new and flawless woodworking square by Woodpeckers. The pre-release will only last for two weeks and comes with free shipping. Order yours before its too late!

Jan. 12, 2011 - [PRLog](#) -- Carbide Processors announces a one-time only, limited edition, 640 woodworking measuring square by Woodpeckers. The new tool from Woodpeckers is a special pre-production version available for only two weeks.

This made to order, uniquely crafted woodworking square has the accuracy, weight and easy handling needed for every woodworking project. Each and every square ordered, will be created from a solid billet of aircraft grade aluminum.

Traditional squares need to be tipped at an angle in order to stay square, making it difficult to mark along the sides. This square, however, has a base thickness of ¾" which allows it to sit up solidly, freeing your hands while you work on your latest and greatest woodworking piece.

Usually, in order to get a square this good, they need to be custom made. But now, with the help of Woodpeckers and Carbide Processors, you too can have your very own perfect woodworking square.

Woodpeckers is famous for being obsessive about the quality of their products. This product comes with a 100% satisfaction guarantee from Carbide Processors. To make this a deal no woodworker can refuse; anyone who purchases one of the one-time only woodworking squares will receive free shipping, only from Carbide Processors.

This product is available in two different versions, inch and metric; with the option of buying the square only or a deluxe unit which includes the square and a custom hard shell case. Pre-orders for this item will only be accepted from January 12 to January 24, 2011. After these dates, the 640 squares will no longer be available. Because each item is made to order, products will ship from Carbide Processors the first week of March.

If you enjoy woodworking, this is the must have measuring tool of the season. Order yours today from www.carbideprocessors.com before it's too late!

###

Carbide Processors, Inc has been in the tool business for 30 years and offers exceptional tools for the toughest applications. Since its founding in 1981, they have been an independent manufacturing company with a heavy research and development component. Carbide Processors offers a variation of woodworking tools and also specializes in custom tooling, brazing carbide and machine coolant filtration systems.
