

Creates DHTML, JavaScript web Menus, Builder - Ultra Menu

A DTHML/JavaScript web menu builder. You can easily complete the creation of navigation menus for a web site even without any development experience related to DHTML or JavaScript with it.

June 10, 2008 - [PRLog](#) -- Ultra Menu is a DTHML/JavaScript web menu builder. With its help, you can easily complete the creation of navigation menus for a web site even without any development experience related to DHTML or JavaScript. It can generate cross-browser pop-up or drop-down menus compatible with all popular browsers including Internet Explorer, FireFox, Netscape Navigator, Opera, Mozilla, Konqueror, Safari and Camino, etc.

Ultra Menu supports hierarchical menus, and you can customize such attributes as layout, text, font style, link, background, border, animation effects, etc. for menus, menu groups and menu items separately based on your requirements. After you have completed the design of a menu, you can add it into your web pages by Ultra Menu's Publish Wizard in a breeze. Ultra Menu will save you a significant amount of time and effort required to fully understand DHTML and JavaScript code capable to support all DHTML-enabled browsers!
