

Titan Lifts introduces the NEW Titan Bulldog™ Moto Cradle

Titan Lifts is proud to announce the release of their brand new Titan Bulldog™ Moto Cradle. The Titan Bulldog™ is a wheel chock that features a spring loaded, cam clamping cradle that gives the bike extra lateral support

Nov. 3, 2008 - [PRLog](#) -- Greenwood, IN – October 31st, 2008 – Titan Lifts is pleased to introduce its new product: the Titan Bulldog™ Moto Cradle. The Titan Bulldog™ Moto Cradle is the first wheel chock to be added to the full line of Titan automobile and motorcycle lifts, and is part of their ever-expanding product line.

With its revolutionary, patent-pending design, the Titan Bulldog™ Moto Cradle is unlike any other wheel chock on the market today. Titan's patent-pending EZ-Load spring-action technology always returns the cradle to the load position, which allows the user to simply push the bike into the rocking cradle where the chock holds the vehicle securely upright. The cradle is made with a solid base so that the weight on the wheel is distributed evenly, and the patent-pending Cam-Clamping design grips the tire as it rolls forward to give the bike extra lateral support. The rigid design along with the rocking and locking Cam-Clamping cradle make the Titan Bulldog™ Moto Cradle the safest and most secure wheel chock available on the market.

The Titan Bulldog™ Moto Cradle has a solid steel construction with a sleek powder coated finish that is available in black, red, blue, orange or a black and orange combination. To guarantee the solid craftsmanship of this wheel chock Titan offers a standard two-year limited warranty on every Titan Bulldog™ Moto Cradle that is sold. The warranty is the best on the market. Adjustable to fit tires from 13" to 22" in diameter and 70mm to 140mm in width, the Titan Bulldog™ Moto Cradle is perfect for supporting a wide variety of bikes in a garage, mounted in a trailer or even on a lift. Available exclusively through Titan distributors, the Titan Bulldog™ Moto Cradle is another example that proves when it comes to Titan Lifts there is "Nothing Stronger."

###

Titan Lifts is located in the heartland of America and consists of automobile enthusiasts and motorcycle riders who believe that people should be able to get professional vehicle lift equipment at economical prices. As one of the leading providers of lifts we pride ourselves in bringing you the top quality products from the large four-post parking lifts to the simple heavy-duty motorcycle mini-jacks. We value and understand the need for affordable, high-grade products that are built to last and designed with your safety in mind. All of our products are produced in ISO 9001 factories with standards that meet and, in many cases, exceed the typical industry standards. With our involvement in the local automotive and motorcycle community, Titan Lifts strives to be more than just a distributor of vehicle lift products.
