

LG Prada 2 Phone Launches SIM Free UK - LG KF900 Prada 2

The new Prada 2 mobile phone from LG has now been released as a SIM Free handset in the UK, we review the LG KF900 Prada 2 and explain the pros and cons of a SIM Free release.

Dec. 10, 2008 - [PRLog](#) -- The second edition of the LG prada phone is commonly known simply as the Prada 2 but also by its model name as the KF900, this new device adds new technology and features to the original KE850 model plus a new text input method hidden in its frame.

The original LG Prada was a success for both the design house Prada and the mobile phones manufacturer LG Electronics, many other collaborations were quick to follow their lead including partnerships between Armani with Samsung and Ted Baker with HTC.

The new Prada 2 mobile phone offers a very similar external design to the original model to the point that to an untrained eye you would be forgiven for thinking that there were no differences, but on closer inspection from a side view the avid admirer will notice a new line down the side of the handset.

Prada 2 Deals: <http://www.phoneslimited.co.uk/LG/KF900+Prada+2.html>

This is because of the inclusion of a full Qwerty keyboard, one of the big bug bears of the KE850 was that the only method of text input was via its large touchscreen, the LG Prada 2 still offers this method however the hidden slide out keyboard makes it far easier and quicker to write text messages and emails.

The unique QWERTY keyboard available only with the new Prada 2 is designed for maximum ease of use. The metallic feel makes it a pleasure to touch and type, complimenting the slick design aesthetic. The silver keyboard along with the additional on-screen, call and hang-up buttons gives fresh tactility to the original minimal concept.

Certified by Schneider-Kreuznach this 5 megapixel mobile phone produces ultra-fine picture quality which includes Image stabilizer whereby users can take steady pictures even when their heart is racing.

The LG Prada II is a quad-band GSM with support for HSDPA 7.2 Mbps, has Bluetooth 2.0 and USB. The extras include microSD card slot for up to 8GB of memory, Wi-Fi, a 3-inch 240x400 touch display and is also capable of recording D1 (720 x 480 pixels) videos at 30 fps (frames per second). The Prada 2 handset

by LG is not just for pleasure, this is a luxury design accessory that can also compete on every level with the most technological hand held devices.

Glowing icons on the face of the phone disappear when not in use to reveal a pure, un-adulterated black exterior. It hosts an array of additional multimedia functions, including an MP3 player and a music multitasking function for messaging. It also boasts an external memory slot, allowing the user to increase memory capacity for images, music and film clips.

PRADAs involvement extends beyond exterior aesthetics to the key elements of the user experience such as the advanced touch interface, ring tones, pre-loaded content, mobile phone accessories and an exclusive leather case, inspired by the classic Italian craftsmen tradition.

The advent of a SIM Free release of this new designer phone will be music to the ears of many mobile enthusiasts as it means that they will not have to sign up to a lengthy contract deal in order to own one of these beautiful new handsets.

The LG Prada 2 SIM free phone is unlocked to all network operators which means that consumers can hold onto their existing SIM card and retain their mobile number, account details (pay as you go or pay monthly) and any SIM saved contacts.

Because there are no networks involved in the purchasing of the LG KF900 Prada 2 those wanting to buy this new phone will not have to undergo any network credit checks so even those with a bad credit history are able to own this new piece of technology.

The SIM free LG Prada 2 also opens up the prospect of purchasing for others as there is no need to register the handset at point of sale, it also means that existing phone users can replace a lost or stolen phone without having to incur any extra line rental charges, contract or network tie-ins.

Although this new phone does not offer the highest technology available such as the 8.0 megapixel camera lenses found in recent releases such as the LG Renoir and Samsung Pixon it does offer a real alternative to the mundane one brand devices with its obvious designer elements and sleek styling.
