

Bath Tub Overflow Drain Invention, A Very Clever One!

A bath tub overflow drain is repaired forever, in less than five minutes! That's what Tim Johannes of Burlington, WI says his new invention will do for your bath tub overflow drain too.

Jan. 13, 2009 - [PRLog](#) -- Tim used to be in the bathroom remodeling business and he saw a lot of bath tub overflow drains in those days. He noticed over and over again that a lot of bath tubs seemed to have a stain under the overflow drain. He did some closer inspections and found that the overflow drain gaskets were old and dry rotted. That allowed water to seep out from behind the overflow drain and down the surface of the tub, making the stain he saw so often while he was on the job.

Tim knew if he could just fix this problem with bathtub overflow drains he would be helping a lot of people and he may just be able to retire on that single idea. Naturally he set out to do just that. He spent a lot of money and man hours coming up with different prototypes he thought would work but didn't work well enough. Then in 2008 he finally got it right with what he calls the ultimate overflow gasket.

The ultimate overflow gasket is a single rubber gasket that extends down into the drain pipe allowing any overflow water to drain all the way into the pipe. It's very easy to install by unscrewing the old overflow drain plate, inserting the ultimate overflow gasket, re-installing the original overflow plate, and you're done. A permanent solution to a problem that has plagued bath tubs for decades. If you would like to find out more information on the ultimate overflow gasket, you can call Tim on his direct line at (630) 917-4033 or log onto <http://www.ultimateoverflow.net>.

###

The Ultimate Overflow Gasket stops bathtub overflow leaks dead in their tracks. A simple installation anybody, any age can do in under five minutes. For more information log onto <http://www.ultimateoverflow.net>
