DotNetNuke (DNN) Outsourcing – A Cost Effective Option for Enterprise Application Development

DotNetNuke (DNN) one of the world's largest open-source web application framework utilizing Microsoft's ASP.NET .

Jan. 13, 2009 - *PRLog* -- DotNetNuke (DNN) one of the world's largest open-source web application framework utilizing Microsoft's ASP.NET has paved the way for clients to manage information on their Web sites, intranets, and extranets. With a growing community of registered users, DNN is ideal for creating commercial websites, online publishing portals, corporate intranets and extranets and custom vertical applications. The software is obtainable free-of-charge with the condition of giving credit back to the DotNetNuke project community and is easily installed and hosted.

Using DotNetNuke tools, it is easy to build dynamic websites with interactive information that can be changed as and when required. This is particularly useful for updating blogs, weather forecasts, news modules and other constantly changing data.

The versatility of DNN is evident in its features:

User-Friendly – ease-of-operation is ensured through site wizards, help icons and a well-developed user interface
Feature-Rich – DotNetNuke has a set of powerful built-in tools that support site hosting, design, content, security, and membership options.
Powerful – DotNetNuke enables administrators to support multiple portals or sites from one install.
Localized – A multi-language feature allows administrators to easily translate their projects and portals into any language.
Fully customizable: Changes to elements such as font type, color and bullet points, to overall site appearance can be easily made without any repercussion on content.

DNN and Outsourcing

The global outsourcing market continues to grow at a steady pace, with a forecast growth rate of 8.1 percent in 2008. Outsourcing IT related services to an offshore center leads to significant cost savings bringing in more value addition, without compromising on quality. India with its large pool of engineers with sound technical skills offers an ideal offshore destination for DNN development.

There are numerous Indian companies serving the global DotNetNuke community by offering premium quality DNN modules, DNN skins and custom development services. Leo Technosoft is one such company offering custom development of DNN modules at reasonable rates.

Advantage Leo
Since 2003, Leo Technosoft with the biggest team of 30 plus DNN developers has the distinction of being one of the first companies to work on core DNN development. Leo has successfully built more than 120 custom DNN modules, more than 100 DNN skins and in excess of 60 sites and portals on Dotnetnuke framework for diverse clientele from the finance, education, health care, manufacturing and retail sector. Leo also has expertise in optimizing DNN performance and delivering applications on a RAD (Rapid Application Development) frame work.

As a DotNetNuke user and installer from its very first version release, Leo Technosoft has the skills and

expertise to install and fully support all your DNN application development needs. Satyen Jain, Managing Director of Leo Technosoft remarks, "On outsourcing your DNN requirements to us, we ensure the smooth creation and delivery of your product through our integrated processes and infrastructure complemented by the expertise of our technical team adept in open source RAD frame work. We provide DNN technology solutions enterprise-wide, with uncompromising emphasis on quality and continuous improvement, leading to substantial cost savings and faster product delivery."

Leo Technosoft Helps You in:

- Analyzing your requirements and offering the right DNN solution
- Designing and building the solution
- Managing DotNetNuke modules and integrating them with your enterprise.
- Providing in-built custom modules
- Utilizing the skills of experienced DNN developers at affordable rates
- Flexible service options to suit your needs

Contact us today on dnn@leosys.in to start the process of developing your custom DNN module. Visit our website www.leosys.in
