

One Of A Kind Cd For Minelab Excalibur Metal Detector Users Available Exclusively At Kellyco

An exclusive, one-of-a-kind CD has been developed for Minelab Excalibur Metal Detector users and is available exclusively from Kellyco Metal Detectors. It's an invaluable tool and Excalibur users both new and old will benefit from it.

Jan. 26, 2009 - [PRLog](#) -- Winter Springs, FL. – Imagine an audio CD that will train your ear to hear the subtle differences between copper, silver, gold, and clad currency signals issued by an Excalibur metal detector; a CD created by a musician who is also an avid and very successful metal detectorist. Kellyco Metal Detectors is pleased to announce a new, one-of-a-kind audio CD that will be invaluable to Minelab Excalibur metal detector users both new and experienced.

Tony Diana, one of Kellyco's long-time customers as well as a renowned musician, has put together a CD that applies the principles of sound engineering to detecting signal recognition. It establishes terminology and definitions for the science of listening to these signals and the art of applying them.

Tony's calm, patient voice provides a gentle explanation to the multitude of tones issued by the Excalibur and compares these tones with the corresponding notes played on a piano and a banjo. For example: By playing a simple A-B split of the sounds issued by a clad penny and a clad dime you will hear the subtle differences between these two similar signals.

Being a trained musician has given Tony an interesting perspective on the various tones, pitches and signals produced by the Minelab Excalibur metal detector; it has also given him great success on Florida's beaches. Tony has found countless rings, necklaces, bracelets and other jewelry; he credits his great success with his ability to tell the subtle differences in sounds issued by his metal detector.

The benefits of owning this CD are many. After listening to the CD a few times you will soon identify the differences in sounds that alert you to those valuable treasures you might well have passed over. Thanks to Tony and this great learning tool you will never miss treasure again!

This all new CD called "Basic Ear Training for Excalibur" is immediately available and Tony has chosen to offer exclusively at Kellyco! Listening to this CD is invaluable and will forever change how you hear metal detector signals and give you more insight into a simple "beep" than you ever imagined.
