

Tax Return Outsourcing: How can APT Services help you

APT Services is the fastest growing outsourcing firm in India, APT Services can be more than handy for the CPA firms or the Tax Practitioners. APT services can be availed at very cheap rate without compromising the quality.

Feb. 4, 2009 - [PRLog](#) -- With the end of the year 2008, many individuals as well as businesses will have to gear up for compiling their financial income and outgo for the year so that the respective tax returns can be filed with the IRS without any hassle.

So what do you do when you need to prepare yourself for the upcoming tax season?

The first thing you would ideally do is to get in touch with a CPA or an authorized tax practitioner (TP) for help and guidance to compile the return.

If you are a business man/woman, the TP would ask you for your financial books. If the books have not been kept, then the TP would first compile your financial books after taking all the details of the transactions your business entered into, during the year. Once the books are compiled, the tax practitioner would generate the return by using tax software like Lacerte or Ultratix or TurboTax etc.

If you are an individual, the TP would give you a tax questionnaire that need to be answered by you. You would also have to hand over to the TP all such documents as are necessary for the TP to compile your return like all W-2s, all 1099s and all the investments details made/sold during the year. All these information would be considered by the TP to generate your return for the year.

How can APT Services be of help in this scheme of things?

APT Services is the fastest growing outsourcing firm in India, the most favored offshore destination of the world. APT stands for Accounting, Payroll and Tax services. APT has been helping small businesses and CPA firms in US in all the fields comprised under Accounting including preparing tax returns.

The staff of APT is trained continuously on:

- a. different aspects of accounting,
- b. different accounting software used and in prevalence in US,
- c. ever-changing aspects tax laws and rules of US, and
- d. different tax software in prevalence in US.

This has ensured that APT maintains its expertise in the niche area of accounting. With this kind of expertise at the disposal, it is but natural that SMEs (Small and Medium enterprises) in US and CPA firms in US can gain immensely not only in faster turnaround but also achieve greater satisfaction of clients. In fact, when it comes to tax return preparation, APT Services can be more than handy for the CPA firms or the Tax Practitioners since:

1. India is in a time zone which is diametrically opposite to US time zone and this means that India is awake when US sleeps. Thus, if a client comes to a TP in US for compilation of the tax return on suppose 3rd Feb'09 afternoon and the TP has APT as its outsourcing partner, then the returns get done on 3rd Feb '09 night (when India is awake but US is sleeping) and the client can have the return filed on 4th Feb'09. Now that's a turnaround any client will be satisfied with.

2. Since there is a constant training being imparted to the staff of APT Services, it ensures that the services provided to clients in US is at par with services provided by any CPA firm in US.

3. There is a foreign exchange advantage available for firms operating from India when services are

provided to clients in US. Indian rupee has been hovering in the range of 40 to 50 against 1 dollar. This means, the services from India can be availed at very cheap rate without in any way compromising the quality.

4. APT Services is owned and managed by Indian CPAs who are bound by strict ethics set up by the governing Institute. This makes the firm more trustful for people in US. In fact, because of this, APT strives to provide best possible measures in not only services provided but also in data security.

So, pick up your phone and call up APT now!

###
