

Eco-Friendly Memory Foam Announces New Eco Sense Green Memory Foam Mattresses

Eco Sense memory foam is plant based and leaves a low carbon footprint. Features include cool comfort, not hot like other Tempur-type memory foam. Natural Bamboo cover included and sizes range from 8" -12". Acella-Flex™ base foam is eco-friendly.

March 29, 2009 - [PRLog](#) -- Eco-Friendly Memory foam, division of Naturally Beds, Inc. Phoenix, AZ. announces the addition of it's "Eco Sense Memory Foam" green mattress lineup. Featuring a plant based foam and natural bamboo cover.

This is NOT your mother's hot, tempur-type, toxic memory foam. It combines castor oil- an odor-free plant-based raw material with recycled foam polymers. Castor plants are native to Asia, and are grown without deforestation. It uses 100% of castor plant material, with the primary by-product used for cattle feed.

Manufactured in facilities using activated carbon scrubbers for one of the smallest carbon footprints in North America. It leaves a significantly smaller carbon footprint than soy-based memory foams. Brazil is destroying it's rain forest to make room for soy fields thus leaving a huge footprint. We stay away from these types of memory foam.

New patented technology offers three methods of cooling: Dynamic Cooling- natural, open-cell structure for flowing air movement by convection, allowing the bed to breathe and stay cooler. Latent Cooling- Foam absorbs heat to faster more comfortable sleep. Greater Heat Conductivity- Reduces heat capacity in the mattress.

Acella-Flex™ Green Foam is odor free and clear, thanks to the addition of activated carbon. Introduce yourself to the newest generation of upholstery foam - made with the technical advantage of SRT™. Acella-Flex™ is the foam of the future! This is our base foam for our new Eco-Sense Memory Foam Mattress.

How the Breakthrough Technology Works-

SRT™ "strut reinforcing technology" advances Acella-Flex™ light years ahead of today's conventional foam, making it more resilient, durable and comfortable. Your comfort and support is assured for a lifetime!

Thicker cell walls strengthen Acella-Flex™

Open cell structure increases resilient comfort

Air flows through SRT™ - allowing it to breathe

Fresh Foam™ odor eliminating technology keeps your home environment fresher, cleaner - like a spring day outside!

Hypoallergenic & Antimicrobial to fight mold growth and odor causing bacteria.

Guaranteed for a lifetime of comfort and durability!
