

CMC Government Services Awarded GSA Schedule 84 Contract

Local Preparedness Equipment easily accessible by government agencies through new GSA Contract.

June 11, 2009 - [PRLog](#) -- CMC Government Services, Inc., an industry leader in providing United States federal, state & local governments and authorized government contractors specialized products, software, data and services that are used for military, intelligence, homeland security, law enforcement, public safety and general government applications, has been awarded a Schedule 84 Federal Supply Contract with the General Services Commission.

With natural disasters like Hurricane Katrina and most recently the devastating tornadoes in Tennessee, South Carolina, and Oklahoma, communities are becoming more aware of how important it is to be prepared in advance for any type of disaster or emergency situation. Signed in June of last year, the Local Preparedness Acquisition Act requires local and state governments to purchase specific equipment and gear from a GSA contract.

CMC Government Services is proud to offer many of these needed items through their new GSA contract. Some of these items include NANUK Protective Cases and Armor Public Safety products. NANUK cases are designed to protect the most sensitive equipment in the harshest environments. Every detail of every case has been refined and perfected to offer the utmost protection and performance.

Also included are Armor Public Safety Products' high-end quality public safety and emergency preparedness products for CERT, law enforcement, emergency services and military use. All products are engineered to withstand daily use and abuse.

CMC Government Services has established relationships with many government agencies by providing them with quality US made Homeland Security, CERT and Local Preparedness Equipment. "A GSA contract validates CMC Government Services as a reliable, dependable company in which to provide quality products and services to government agencies and that our processes and standards are exemplary. This award establishes a step up in our relationship with the government and we will work to provide the government with more, quality made products," said CMC Government Services CEO, David Goldstein.
