

Tri-Tronics welcomes Junior to the Family!!

Tucson, AZ - Tri-Tronics, the industry standard in electronic dog training equipment, is excited to announce the latest addition to its product line, The Sport®Junior.

Aug. 11, 2009 - [PRLog](#) -- Tri-Tronics welcomes Junior to the Family!!

Tucson, AZ - Tri-Tronics, the industry standard in electronic dog training equipment, is excited to announce the latest addition to its product line, The Sport®Junior.

The rugged design and ¼ mile range of the Sport®Junior makes it the ideal remote trainer for yard drills or working with hunting dogs. The remotely-activated collar light is the perfect safety feature allowing you to see your dog during evening or early morning walks. The compact waterproof receiver and collar strap fits dogs of all sizes. The Junior features 7 levels of continuous stimulation and 7 levels of momentary stimulation.

“Our engineers wanted to design a compact, simple, and affordable collar system that would meet Tri-Tronics’ rugged quality standards. They succeeded with the Junior,” stated Gary Williams, sales and marketing manager.

Novice dog trainers will welcome the Junior’s simple dual stimulation design and affordable price (\$188.00 MSRP). “We wanted to offer a training system especially suited for first time trainers. The Junior is perfect for hunters who may be new to dog training,” exclaimed Williams.

Experienced trainers will enjoy the same high quality and flexibility that they have come to expect from Tri-Tronics. Both the transmitter (\$121.00 MRSP) and receiver (\$98.95 MSRP) of the Junior can be purchased separately. Each can be married to work with a G2 or G3 EXP training system.

Tri-Tronics manufactures a full line of electronic dog training equipment. Tri-Tronics training collars are backed by a 30-day money-back, 2-year warranty. The Junior is proudly manufactured in the USA.
