

Hyatt Hotels Crushes Marriott In Battle Of The.....

Bathroom savings. Hyatt Hotels has been using a revolutionary new invention called the Ultimate Overflow Gasket in their bathroom remodels. This genius new product is the brainchild of a man named Tim Johannes from Lake Zurich, IL.

Oct. 26, 2009 - [PRLog](#) -- Why would anybody care about a revolutionary new invention with such a strange name? Because it's inexpensive, easy to install & literally saves money from draining out of a bathtubs overflow drain. The old poor design of overflow gaskets haven't changed in over 50 years. At least nothing has changed in their design until Tim's stroke of genius.

Tim used to be in the bathroom remodeling business with an acrylic bath remodeling company called Bathroom Crafters, Inc. One thing he noticed consistently with bathrooms was an unsightly overflow gasket. You know what I'm talking about. Take a look at your own bathtubs overflow drain & you'll see at the very least, water stains. For many people they see rust stains that come out of the overflow drain and drip down the bathtubs front.

The reason this happens is because of a flat rubber gasket that goes behind the overflow cap. Once this thin rubber gasket dry rots (and it doesn't take long for that to happen), the leaks begin. Left alone, the leaks continue until the overflow gasket itself begins to rust from behind. Until Tim's invention came along there was nothing a person could do about this except to replace the overflow gasket & cap. Not so with what Tim has done with his revolutionary new design. He actually created a single rubber piece that fits behind the overflow cap & extends down into the drain itself. Sorry copy cats, Tim has a worldwide patent pending on this revolutionary new product.

This simple but ingenious new design has made any type of overflow drain replacements or stains a thing of the past. To top it off, the Ultimate Overflow Gasket is so simple to install it only needs a screwdriver & can be installed by anyone from ages 5 to 95 in under 5 minutes. The idea that a hotel chain with hundreds of thousands of rooms worldwide like Hyatt hotels has begun using the Ultimate Overflow Gasket with their acrylic bath remodeling systems says a lot about it's reliability, cost savings, convenience & warranty. Did I mention the Ultimate Overflow Gasket has a lifetime warranty?

Hotel chains like the Hyatt & Marriott are not the only ones who have used this product as a stand alone product or combined with an acrylic bath remodeling system. There are bathroom remodeling companies & distributors as well as plumbers across the country that recognize the brilliance of the Ultimate Overflow Gasket who use it as well.

What an average guy like Tim stumbled upon just could be the thing that replaces the old standard of the last 50 years & may just make him a millionaire in the process.

For anyone who would like to get in touch with Tim Johannes and find out more, they can call him at (630) 917-4033. Or better is to send him an email at TJohan5826@aol.com. Tim is very busy these days managing his orders & fielding phone calls so if you send an email, please put in the header "UOG Inquiry". That will help him sort all the inquiries he's been receiving. In case your wondering, yes I use one of these in my bathtub & can tell you with 100% confidence that it is all Tim says it is.

###

The Ultimate Overflow Gasket stops bathtub overflow leaks dead in their tracks. A simple installation anybody, any age can do in under five minutes. For more information log onto
