

New Zero-Detect Camouflage Pattern for Turret and Turret XL Hunting Blinds from KillZone Hunting

The Turret and Turret XL Ground Blinds from KillZone Hunting are now available with Zero-Detect camouflage. This new pattern provides hunters with more options for blending in to any environment.

March 15, 2010 - [PRLog](#) -- The Turret and Turret XL Ground Blinds from KillZone Hunting are now available with Zero-Detect camouflage. In addition to the Autumn Wooded Oak camouflage pattern, this new pattern provides hunters with more options for blending in to any environment.

The **Zero-Detect Turret XL Hub Blind** features a lightweight hub and fiberglass pole design with a scentless carbon protected interior and weatherproof polyester fabric. Windows on all sides of the blind give you superior vision, and a zippered roof hatch provides more shooting and hunting options. The Turret XL Hub Blind is available at <http://www.killzonehunting.com/hunting-ground-blinds/turret-xl-hub-style-ground-blind-zero-detect-camo.html> for only \$99, including free shipping.

The **Zero-Detect Turret Pop Up Blind** features a lightweight steel frame, easy setup and takedown, and integrated portal windows with removable camouflage mesh. The Turret Pop Up Blind is available at <http://www.killzonehunting.com/hunting-ground-blinds/turret-pop-up-style-ground-blind-zero-detect-camo.html> for only \$74.99, including free shipping.

Why Choose Zero-Detect Camouflage?

The Zero-Detect pattern is extremely versatile, making the blind disappear both in woodland terrain and grasslands. **The unique color combination adapts to any environment and any hunting season.**

The green hues blend well with grass and brush, making the pattern well adapted to early season hunting. The darker brown hues blend well into wooded areas and are perfect for late season hunting. To top it all off, the **white highlights add contrast and depth** to the pattern, an element missing from many of the top camo patterns on the market.

Zero-Detect camo is a **pattern-based camouflage** rather than picture-based. Developed after weeks of careful experimentation, Zero-Detect camo effectively eliminates the blind's profile in almost any environment with a precise combination of color and pattern.

The Making of Zero-Detect

Steve Bursey, the owner and founder of Zero-Detect Hunting, is an avid hunter, artist, and businessman who set out to create a camouflage design that would eliminate rather than enhance the profile of a hunting blind.

His prior experience with other camouflage designs suggested that they outlined his profile rather than hid it. He was constantly being spotted by deer, turkeys, and other game. So Bursey set out to create his own

camouflage pattern.

After weeks of experimenting in the field, Bursey's task was finally complete. He had designed a camouflage pattern that **blends flawlessly into field, forest, and hardwood terrain** and even takes into account the dead giveaway of the blind's silhouette against a lighted sky background.
