

Lower Utility Bills, Lower Electric Bills thanks to the Electric Saver 1200

The Electric Saver is a device designed to regulate electricity supply into residential houses.

Aug. 16, 2010 - [PRLog](#) -- The Electric Saver is a device designed to regulate electricity supply into residential houses. With a 20 year warranty on workmanship and device defects, this product will aid you lower electricity bills by up to 25%!

The device operates on the same principle as the KVAR PU-1200, the difference being that the Electric Saver 1200 goes for ¼ the price! It is installed near your electric panel. This allows it to track the electricity going into your home and regulate it thereby giving you lower electric bills. It also comes with the surge suppression feature that allows it to take care of your electronics. It can handle up to 2000 joules of heat. The device is similar to the capacitors your power company installs on electricity poles. These are installed to ensure the power factor in the electricity being transmitted is controlled to within certain limits. These capacitors regulate demand ensuring electricity is being used properly. When you install the Electric Saver in your home it will also regulate your power factor thus 'slowing down' your electric meter legally, giving you lower electric bills.

A unit box is 6"X6"X4" in dimensions and has the ability to handle up to 200 amps. It works in the 50/60 frequency range. The outer casing is Nema 3R rated and you won't have to worry about the rainy days as it is rainproof.

On purchasing the device you get a 100% money back satisfaction guarantee. This leaves you with nothing to lose. When you want to lower utility bills, this is just the device to aid you.

One also has the option of becoming a dealer. If this is your interest the devices can be mailed to you for free via parcel post if you are within the US, Hawaii, Puerto Rico or Alaska. Unlike other energy saver product companies, there is no initial setup fee. Shipping is done within 24 hours of payment. All units come with a 20 year warranty and have easy to install instructions with them. In the event that any hurdle should arise, the supplier is only a phone call away. The Electric Saver - helping people lower utility bills.

The Electric Saver is an electric gadget designed to aid owners of residential houses to cut down on their electricity usage. It is manufactured in the US in Miami Florida. The main aim of the product is to ensure the efficient use of electricity and help you effectively cut down on electricity bills.
