

## **Bathmaster Sonaris Reclining Bath Lift Review - Home Accessibility**

**Oct. 30, 2010** - [PRLog](#) -- Many Americans are in the unfortunate position of needing assisted living. The number of these individuals range in the millions. This number covers the gamut from the disabled to the elderly. Age, at times, is not a factor regarding individuals that need to be assisted in some capacity regarding their daily activities. Many of these people will have to face the dreadful fact of entering into an institution of supported living.

Largely, the elderly and disabled enter into institutions of assisted living because they can no longer shower or bathe independently on their own home. Bathing is a crucial and imperative process of life. Unfortunately many elderly and disabled folk simply cannot bath without help. The bath tub lift is an excellent product to help these people take a warm and therapeutic bath without the fear of slipping and falling. Security is assured with the proper bath lift.

However, when choosing a bath lift one must be selective to ensure that he or she will make the right choice. The Bathmaster Sonaris reclining bath lift is the industry's number one seller. It is no wonder because the Bathmaster Sonaris bath lift has many characteristics for the user to operate it with tremendous efficiency and accommodation.

Some of these features are listed below. Unlike other bath lifts that automatically recline to a specific angle, the Bathmaster Sonaris Reclining Bath Lift has a reclining feature that is completely controlled by the user. Once the Bathmaster Sonaris has completed its descent, you can adjust the reclining level using the hand controller. Any angle can be selected and recline up to 40 degrees to achieve the most comfortable and suitable position for the user. The Sonaris is the only bath lift in the industry that has a single-button operation that allows the user to control the unit at will. One can position the backrest upright or recline it back to a more relaxed position. Sufficient leg room is maintained during these processes for a comfortable position in the bath tub.

The hand controller has large, textured control pads to assist the visually impaired. The safety mechanism is built-in and will not allow the bath lift to lower into the tub if there is not enough charge to lift the user back up. Furthermore, the waterproof hand remote will show a warning light and sound off an audible beep letting the user know the bath lift is in need of a charge. The Bathmaster Sonaris possess a self diagnostics system to determine if there are any issues with the bath lift. To optimize battery performance, there is an automatic sleep function that comes into effect when the product is idle for 10 minutes. The sleep function is easily disabled by pressing the control pad.

This tremendous product has a loading capacity of up to 300 lbs and it lowers the user to 2.5 inches from the bottom of the tub. The speed at which it functions is measured to ensure ample comfort for the disabled and elderly.

There are large flaps on the side to allow for easy transfer. With a fully charged battery, one can get an amazing 18-20 lifts. The suction-cup feet may be angled in any direction to suit the curvature of the bath.

The Bathmaster Sonaris will provide an avenue for people the freedom to stay in their homes and live with comfort as he or she enjoys the benefits of a therapeutic bath. This bath lift for the disabled and elderly is

made of all-plastic construction and is easy to clean, yet strong and durable to ensure stability and years of use.

The above features clearly illustrate why this product is an excellent choice for the ultimate bathing experience. The Bathmaster Sonaris reclining bath lift combines superb functionality, outstanding performance and wonderful design giving you a great bathing experience. If you have limited mobility, you can still enjoy the benefits and relaxation of taking a bath with the Bathmaster Sonaris Reclining Bath Lift. View The Bathmaster Sonairs at Home Accessibility
