

Golden Spot Launched Low Cost Wire Mesh Welding Machine, Suitable for Precise Wire Mesh Making

Golden Spot formally introduced to public their low cost auto wire mesh welding machine GSA-80 and semi-auto wire mesh welding machine GSA-80M, which both are flexible for making different types and sizes of wire mesh.

Nov. 15, 2010 - [PRLog](#) -- Golden Spot Wire Mesh Welding Machine GSA-80 is equipped with precise Spot Welding System, which helps to adjust the up cylinder, the electrodes, and the fixture based on wire pitch, and this system also can set the welding time and current strength for every individual spot. GSA-80 Auto wire mesh welding machine has auto wire load carriage with wire hopper, which is for loading pre-cut wires. The system will not only automatically feed and collect wires, but also can make the perfect pull-out wire quantity and length as your request. Furthermore, this auto welding machine is also equipped with servo motor and gripping pliers to adjust the required pitch and to carry the welded mesh to next work station.

The worth mentioned is the Controlling System of GSA-80 Auto wire mesh welding machine, GSA-80 adopts the man-machine interface windows based for the use of P.L.C, all the parameters and figures can be set on the screen monitor. It's simple to operate and easy to maintain. This welder also features space saving, high-speed and High-productivity (0.6sec/line). Especially it is suitable for higher production with standard mesh size. Wire shelving, Display rack, Wire Basket, Trolley, Kitchenware, Animal Cage, Storage Rack, Material containers, Grill, and various steel wire products we can find on the markets, all can be made by this wire mesh welding machine.

Another acclaimed low cost welding machine that Golden Spot designed is GSA-80M Semi-Auto Wire Mesh Welding Machine. This semi-auto welding machine must be manually fed the lines wire, but it also has an automatic hopper for cross-wires as GSA-80. Easy Operation and maintenance are GSA-80M's main features, besides that, it is economic and space-saving. Moreover, this welder is also capable of producing variety of meshes. It is particularly suitable for making frames. GSA-80M's application includes Supermarket Shelving Divider, Storage System Rack, Wire shelving, Display rack, Wire Basket, Trolley, Kitchenware, Animal Cage, Storage Rack, Material containers, Grill and other Steel Wire Products.

Generally, Golden Spot's equipment and machinery is adapted to customer-specific requirements. Therefore, they can provide a wide variety of technical solutions to meet the different requirements in the production of welded mesh.

Golden Spot Industry, a professional manufacturer of various auto spot welding machines, was established in 1979. We have a strict quality control in each stage of the production process from design and

manufacturing to finish a machine are accomplished under one roof. We have excellent R&D team and have rewarded almost 40 patent rights- proves the advanced technology. Also, certified with CE and ISO-9001:2000 (R&D) - improves work more effectively.
