edotco Group selects Tarantula software for asset lifecycle management

edotco Group has chosen Tarantula Red Cube, as the core asset management platform for their extensive tower portfolio.

Dec. 4, 2015 - *PRLog* -- edotco Group, Southeast Asia's first independent telecommunications infrastructure services company, has chosen Tarantula Red Cube, as the core asset management platform for their extensive tower portfolio.

"As we grow our business across multiple countries, we need a product that retains the granularity of site-level data and delivers robust, enterprise-grade information. We trust Tarantula for its ability to handle core processes that bring together the commercial and physical aspects of tower businesses into a consolidated management platform. Red Cube's capability of reporting at country level, as well as at group level added value to edotco Group's multi-country business operations," said Suresh Sidhu, CEO, edotco Group.

Tarantula CEO, Udhay Mathialagan said, "edotco is the regional leader in the tower industry space with significant investment commitments and progressive growth in new markets. We are honoured to be selected by such an industry leader and committed to partnering with them in each of the markets they pursue. Red Cube's built-in flexibility and business process library enable edotco to strengthen their business processes and cleanse legacy, inherited data. Our customer interactions across the globe with regional expertise in Asia are key in helping us navigate multi-cultural business environments with ease."

About edotco

Established in 2012, edotco is a wholly owned telecommunication infrastructure services subsidiary of Axiata with independence in its management and operations. edotco provides end-to-end solutions in the tower services sector including co-locations, build-to-suit, energy, transmission, and operations and maintenance (O&M) in the region of Asia.

As the first regional tower services provider in Asia, edotco delivers equal access and efficient telecommunications infrastructure services and solutions across a portfolio of over 15,000 towers in our countries of operation: Malaysia, Sri Lanka, Bangladesh, Cambodia and Pakistan. edotco's services are supported by the state-of-the-art real time monitoring service, echo.

About Tarantula

Tarantula is a world leader in telecom site management software and a trusted partner of leading telecom infrastructure operators in more than 15 countries. Through its specialised site management toolset, Tarantula is a fundamental pillar of support behind the management of more than 350,000 mobile towers and assets worth US$25 billion around the world.

Red Cube is Tarantula's flagship product and the tower industry's tool of choice for asset lifecycle and telecom site management. It has been developed by assimilating industry best practices across various complex values chains of tower site management. The tool offers total business control with 29 out-of-the-box processes, flexibility through a configurable framework, and visibility of assets from order to installation. The tool also offers additional capabilities such as location management, asset and lease management, operations and maintenance, invoice management, mobile field-force solutions, and comprehensive dashboard reporting.
